The Michigan Department of Environmental Quality (MDEQ) today announced the approval of two permits sought by Aquila Resources Inc. for the proposed Back Forty Mine Project in Lake Township, Menominee County, Michigan.

The department approved the company’s applications for a Nonferrous Metallic Mineral Mining Permit (Mining Permit), and the Michigan Air Use Permit to Install.

These decisions come after comprehensive and detailed reviews of the applications and careful consideration of the comments received throughout the review process.

Two additional necessary permits, National Pollution Elimination System (NPDES) permit and a permit for wetland impacts are under consideration.

The MDEQ is dedicated to respect for Michigan’s citizens, stewardship of the environment, and support for a sustainable economy.
